

Product Data Sheet

# FilmTec™ Hypershell™ NF245N-8038/48-FF and FilmTec™ Hypershell™ NF245N-3838/48-FF Nanofiltration Elements

### Description

FilmTec<sup>™</sup> Hypershell<sup>™</sup> NF245N-8038/48-FF and FilmTec<sup>™</sup> Hypershell<sup>™</sup> NF245N-3838/48-FF Nanofiltration Elements offer an industry-wide unique combination of features:

- 48-mil feed spacer : Designed to treat high-viscosity liquids and improve cleaning effectiveness. Reduces the pressure drop across the pressure vessel.
- Up to 70°C continuous operating temperature capability due to distinct element and membrane design.
- Hypershell<sup>™</sup> technology: A machined polypropylene rigid outer shell providing multiple benefits:
  - Minimization of deformation and channeling, which prevents premature element failure throughout the product lifetime.
  - Improved bypass control compared to mesh wrapped elements, which results in energy savings (see Figure 1), improved processing, and efficient Clean In Place (CIP).
  - Safer and faster loading and unloading of elements due to the rigid Hypershell<sup>™</sup> exterior, which does not expand over time.
  - Easy and permanent identification due to laser-etched model names and serial numbers.
- Sanitary element design: All materials of construction are compliant with U.S. Food and Drug Administration regulations for indirect contact with food. It is the responsibility of the user to meet any if there are additional regulatory requirements required for specific applications.
- Robust FilmTec<sup>™</sup> NF245 membrane sheet designed to reject organics with a molecular weight above 300 amu while passing monovalent salts.

#### **Description (Cont.)**

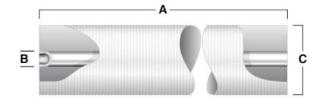

FilmTec<sup>TM</sup> Hypershell<sup>TM</sup> Elements have less exterior bypassing and require approximately 30% less flow than mesh wrap for an equivalent pressure drop. The graph indicates the flow comparison at 4psi  $\Delta P$ . Energy can be saved by reducing flow.

### **Typical Properties**

	Activ	e Area		Minimum ATD OD	
FilmTec™ Specialty Membranes	(ft <sup>2</sup> )	(m²)	Feed Spacer Active Thickness (mil)	(inch)	ATD included
Hypershell™ NF245N-8038/48-FF	275	25.5	48	7.9	No
Hypershell™ NF245N-3838/48-FF	46	4.3	48	3.8	No

Sales specifications may vary as design revisions take place.

### Element Dimensions

#### Figure 2: Element Dimensions

		Α	E	3		С
FilmTec™ Specialty Membranes	(in.)	(mm)	(in.)	(mm)	(in.)	(mm)
Hypershell™ NF245N-8038/48-FF	38	965	1.125 ID	28.58 ID	7.9	201
Hypershell™ NF245N-3838/48-FF	38	965	0.83 ID	21.08 ID	3.8	97

1. FilmTec<sup>™</sup> Hypershell<sup>™</sup> 8-inch elements are designed to fit Schedule 40, 8 inch stainless pipe (nominal 7.98 inch ID).

FilmTec<sup>™</sup> Hypershell<sup>™</sup> 4-inch elements are designed to fit Schedule 80, 4 inch stainless pipe (nominal 3.83 inch ID).

## Operating and Cleaning Limits

Maximum Operating Pressure <sup>a</sup>	800 psig (54.8 bar) at 45°C 400 psig (27.5 bar) at 70°C	
Maximum Operating Temperature		
pH 4 – 9	158°F (70°C)	
pH 3 – 10	122°F (50°C)	
pH 2 – 11	95°F (35°C)	
pH Range	pH2 – 11	
Free Chlorine Tolerance	Below Detectable Limits	
Hydrogen Peroxide Limit, Cont. Operation	20 ppm	
Maximum Pressure Drop ( $\Delta P$ ) per element		
Temperature < 50°C	15 psi (0.9 bar)	
Temperature < 70°C	8 psi (0.5 bar)	
Maximum Pressure Drop ( $\Delta P$ ) per vessel		
Temperature < 50°C	60 psi (4.1 bar)	
Temperature < 70°C	30 psi (2.0 bar)	
Maximum Cross-Flow		
FilmTec™ Hypershell™ NF245N-8038/48-FF	80 gpm (18.2 m <sup>3</sup> /h)	
FilmTec™ Hypershell™ NF245N-3838/48-FF	30 gpm (6.8 m <sup>3</sup> /h)	

a. See Figure 3, Maximum allowed temperature and pressure for FilmTec<sup>™</sup> Hypershell<sup>™</sup> NF245N-8038/48-FF and FilmTec<sup>™</sup> Hypershell<sup>™</sup> NF245N-3838/48-FF.

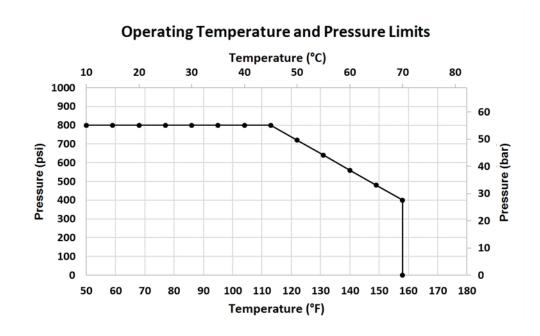

Figure 3: Maximum allowed temperature and pressure for FilmTec<sup>™</sup> Hypershell<sup>™</sup> NF245N-8038/48-FF and FilmTec<sup>™</sup> Hypershell<sup>™</sup> NF245N-3838/48-FF

Clean in Place	Maximum CIP Pressure	15 to 75 psi (1 to 5 bar)				
(CIP) Parameters	Maximum CIP Temperature					
(CIF) Farameters	рН1.8 to pН11	122°F (50°C)				
	pH1.8 to pH11.2	113°F (45°C)				
	pH Range	pH1.8 – 11.2				
	Free Chlorine Tolerance	Below Detectable Limits				
	Hydrogen Peroxide Limit	1,000 ppm

	membrane failure. DuPont Water Solutions	ree chlorine and other oxidizing agents will cause premature a recommends removing residual free chlorine using pretreatment, to <u>Dechlorinating Feedwater</u> (Form No. 45-D01569-en) for more				
Important Start-Up Information	Normally, new elements are cleaned prior to initial use. The cleaning procedure should be based on the application for which the elements are to be used. If cleaning with formulated agents is not available, an alkaline wash with a wetting agent is					
	recommended prior to initial use. Please refer to <mark>FilmTec™ Cleaning Guidelines</mark> (Form No. 45-D01696-en) for more information.					
	Avoid any abrupt pressure or cross flow variations on the spiral elements during start- up, shutdown, cleaning or other sequences to prevent possible membrane damage. During startup, a gradual change from a standstill to operating state is recommended as follows:					
	<ul> <li>Feed pressure should be increased gradually over a 30-60 second time frame.</li> <li>Before initiating cross-flow at high permeate flux conditions (e.g., start-up with high temperature water), the set operating pressure should be maintained for 5-10 minutes.</li> </ul>					
	Cross-flow velocity at set operating point should be achieved gradually over 15-20 seconds.					
	<ul> <li>Avoid permeate-side backpre</li> </ul>	ssure at all times.				
General Information	<ul> <li>Keep elements moist at all times a</li> <li>To prevent biological growth durin elements be immersed in a preser</li> </ul>	g system shutdowns, it is recommended that

Customer Notice	DuPont strongly encourages its customers to review both their manufacturing processes and their applications of DuPont products from the standpoint of human health and environmental quality to ensure that DuPont products are not used in ways for which they are not intended or tested. DuPont personnel are available to answer your questions and to provide reasonable technical support. DuPont product literature, including safety data sheets, should be consulted prior to use of DuPont products. Current safety data sheets are available from DuPont.			
	<ul> <li>Please be aware of the following:</li> <li>The use of this product in and of itself does not necessarily guarantee the removal of cysts and pathogens from water. Effective cyst and pathogen reduction is dependent on the complete system design and on the operation and maintenance of the system.</li> <li>Any concentrate or permeate obtained from the first hour of operation should be discarded.</li> </ul>			
Regulatory Note	This product may be subject to drinking water application restrictions in some countries; please check the application status before use and sale.
